Professional Summary

Computer Science Engineering student specializing in Cybersecurity with hands-on backend development experience using Node.js, Express.js, PostgreSQL, MongoDB, and Prisma ORM. Experienced in building REST APIs, JWT authentication, RBAC, input validation, database-driven applications, and security-focused backend systems through an internship and personal projects.

Education

B.Tech in Computer Science Engineering — Cybersecurity Specialization <i>The Neotia University</i>	2023 – Present <i>Sarisha, West Bengal</i>
CGPA: 9.39/10 (through 6th semester)	
Class XII (CBSE) <i>Guru Nanak Public School, Alampur</i>	2022 <i>Howrah, West Bengal</i>
Percentage: 91%	
Class X (CBSE) <i>Guru Nanak Public School, Alampur</i>	2020 <i>Howrah, West Bengal</i>
Percentage: 92%	

Technical Skills

Languages: JavaScript, Java
Backend: Node.js, Express.js, REST APIs, JWT, RBAC
Databases & ORM: PostgreSQL, MongoDB, Prisma ORM
Frontend: React, HTML, CSS
Security: Authentication, Authorization, Helmet, CORS, Rate Limiting
Tools: Git, GitHub, Postman, Swagger
Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks
Problem Solving: Solved 200+ LeetCode problems covering data structures and algorithms

Experience

Web Development Intern — Backend / MERN Stack <i>Blend Vidya EdTech</i>	Nov 2025 – Feb 2026 <i>Remote</i>
- Developed backend services and REST APIs using Node.js, Express.js, and MongoDB for an attendance and performance management platform. - Implemented JWT-based authentication and role-based authorization for Admin, Manager, and Employee workflows across user, attendance, and performance APIs. - Built and integrated API modules for user and department management, attendance sessions and records, and performance metrics and records, with centralized error handling and request-size/CORS configuration.	

Projects

Momentum — Backend for Opportunity Management Platform <i>Node.js, Express.js, PostgreSQL, Prisma ORM</i>	Jun 2026 – Jul 2026
- Developed a backend service using Node.js, Express.js, PostgreSQL, and Prisma ORM for managing opportunities, users, and bookmarks. - Built REST APIs with JWT-based authentication, role-based access control (RBAC), search, filtering, pagination, and administrative operations. - Implemented core backend security and reliability practices including Zod input validation, Helmet security headers, rate limiting, CORS, and centralized error handling. - Tested API endpoints using Postman and manual functional testing; documented APIs using Swagger and deployed the application on Render.	
KindCycle — MERN Peer-to-Peer Donation Platform <i>MongoDB, Express.js, React, Node.js</i>	Jan 2026 – Mar 2026
- Developed a full-stack peer-to-peer donation platform using MongoDB, Express.js, React, and Node.js for managing users, item listings, claims, and moderation workflows. - Built REST APIs with authentication, authorization, role-based access control (RBAC), and item approval workflows. - Implemented a karma-based trust and reputation system to encourage responsible participation in the peer-to-peer donation process.
